

BAXOLELE MAZWI

Construction Studies | Data Analytics | Business Intelligence

066 193 3064 | mazwiibaxolele@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | Johannesburg, South Africa

PROFESSIONAL SUMMARY

Final-year BSc Construction Studies student at the University of the Witwatersrand, combining an engineering foundation with hands-on data analytics experience. Completed end-to-end analytical pipelines on real business datasets using Python, SQL, and Power BI — covering data ingestion, cleaning, transformation, validation, and interactive dashboard delivery. Holds the IBM Data Analyst Professional Certificate. Thinks in terms of systems, operational efficiency, and how data translates into better decisions — grounded by direct exposure to construction and project engineering environments.

CERTIFICATIONS

IBM Data Analyst Professional Certificate IBM / Coursera	2025
Associate Data Analyst Track DataCamp	In Progress
Data Engineering Programme ALX Africa Academy	In Progress

EDUCATION

Bachelor of Science in Construction Studies University of the Witwatersrand, Johannesburg	2023 – Present
- Completing final year end of 2026; graduation ceremony March/April 2027 - School of Construction Economics & Management - Relevant modules: Project Management, Quantities & Specifications, Construction Technology, Engineering Systems, Cost Management	

WORK EXPERIENCE

Data Science & Analytics Intern Future Interns · Remote	Jan 2026 – May 2026
- Analysed 7,000+ telecom customer records to identify churn patterns, revenue trends, and customer behaviour segments using Python (Pandas, Matplotlib, Seaborn) - Processed and validated 40,000+ marketing campaign entries with SQL, cross-referencing Python findings and generating query-based business insights - Built three-page interactive Power BI dashboards featuring KPI cards, trend charts, and churn cohort visualisations to support decision-making - Delivered end-to-end project pipelines: data ingestion, cleaning, exploratory analysis, feature engineering, SQL validation, and visual reporting - Maintained version-controlled GitHub repositories covering notebooks, SQL scripts, raw data, and processed exports	
AI-Powered Data Analysis Intern Excelerate · Rochester Institute of Technology · Remote	Jun 2026 – Present
- Applying AI tooling and data engineering techniques to real analytical workflows through an international structured programme - Building further capability in pipeline automation, AI-assisted analysis, and data engineering principles at scale	
Student Intern AZRA Developments	2025
- Supported site coordination, progress reporting, and operational documentation across active construction projects - Gained direct exposure to engineering workflows, project execution structures, and real-time decision-making on-site	
Student Intern (Job Shadowing) Priotech Projects	2024
- Observed and supported a Site Manager across project coordination, planning reviews, and on-site progress tracking - Developed understanding of cross-functional team communication, risk considerations, and daily project management operations	

- Tutor – Quantities & Specifications** | *Wits School of Construction Economics & Management* 2026 – Present
- Facilitated academic support sessions, simplifying complex quantity surveying and specification concepts for fellow students
 - Adapted explanations to different learning styles, improving comprehension and assessment performance
- Mathematics Tutor** | *Matric Students (Private)* 2026 – Present
- Provided structured one-on-one tutoring for Grade 12 learners preparing for NSC Mathematics examinations
 - Developed step-by-step problem-solving frameworks that improved learner confidence and results
- Peer Mentor** | *Wits School of Construction Economics & Management* 2025 – Present
- Mentored junior students through academic transitions, course navigation, study strategy, and professional development

PROJECTS

- Customer Churn & Retention Analysis** | github.com/mazwiibaxolele/FUTURE_DS_02 2026
- Full pipeline: Python data cleaning → EDA → cohort analysis → SQL cross-validation → Power BI dashboard
 - Analysed 7,043 telecom customer records; identified month-to-month contracts and fibre optic users as highest-risk churn segments and quantified revenue at risk
- Marketing Campaign Performance Analysis** | *Future Interns Internship* 2026
- Processed 40,000+ campaign records across multiple channels; applied segmentation and conversion rate modelling
 - Delivered benchmarked performance indicators and channel efficiency insights to support campaign strategy decisions

TECHNICAL SKILLS

Programming:	Python (Pandas, NumPy, Matplotlib, Seaborn), SQL
Analytics:	Exploratory Data Analysis, Cohort Analysis, Churn Modelling, KPI Reporting
Visualisation:	Power BI (DAX, Power Query, Interactive Dashboards), Matplotlib
Databases:	MySQL Workbench, Relational Database Querying
Tools:	VS Code, Jupyter Notebook, Git, GitHub, Microsoft Excel
Engineering:	Construction Technology, Project Coordination, Quantities & Specifications

KEY COMPETENCIES

Systems Thinking | Process Optimisation | Analytical Reasoning | Data Interpretation | Technical Communication | Cross-functional Collaboration | Independent Learning | Leadership & Mentorship
